

# EXTRA-LARGE INCLUSIONS

ICE GROUP

A well-known ice cream producer in the Netherlands operating in the „private label“ market and his new product placed in the Lidl chain, and, by the way, our new product, as it is made on an Ice Group inline machine (**Expert LVF**), with the help of our fruit feeder (**Master IF**), special collectors and mixers, constituting, along with a special dozer, a full production system.

The extinguishing feature of the product are extra-large inclusions in the ice cream

# How many and how big?

ICE GROUP

The discussed product corresponds to a strong market trend promoting **"American"** style ice cream in **1-pint** cups with a large number of inclusions. We have here both something to rub on the tongue, something to bite with the teeth, something melting in the mouth, very often we talk about an original set of taste impressions, creating something we call in our slang **"mouth sensation"**.

Pretty peanut butter contains ~20% chocolates with peanut butter filling.

Inclusions of even 30 mm diameter!

Even 80 g inclusions in every cup!

# Complete production system supplied by Ice Group

**ICE GROUP**

Expert LVF 4 DP  
(4-wide filling machine  
for two sizes of cups)

Enlarged, operator-friendly touch screen  
panel - with local language option
